8. Answer all questions even if you do not know the answers. Make an intelligent guess. Remember, there is no negative marking.
9. While solving Psychology questions, do not spend too much time solving any single question. If you are not getting the solution beyond one minute, move on to the next question.
10. Keep last 10 minutes to check if you have left any questions un-answered and attend to them. Otherwise, shade the answer with your best guess.
